

Town of Black Earth Zoning & Land Division Guide

1704 Blue Mound Street

Black Earth, WI 53515

608-767-2447

Effective Date: June 1, 2010

This guide is designed to provide you with an outline of the information necessary to rezone, divide or develop land within the Town of Black Earth. If you are interested in pursuing any of these applications, or to initiate the process, please contact the Town Clerk for the appropriate application(s).

The Town of Black Earth has adopted local regulations depending on the intent and goals of your project. All adopted Town policies are outlined in the Town's Comprehensive Plan and local Code of Ordinances. Please be aware that each process and the required materials differ depending on the action requested. It is important to note that the Town is under the jurisdiction of Dane County. It is recommended that you consult with the Dane County Department of Planning and Development prior to initiating any formal process in the Town. The County has an individual process for each of these activities and will require separate approvals. The Town's guidelines are subject to change at any time.

To initiate a formal process in the Town, please contact the Town Clerk. The Clerk will initiate the proper process with the Town's Planning Commission and assist you in obtaining the proper applications. The first step of any process is to meet with the Planning Commission for an informational overview of the project that you would be interested in pursuing. The objective of the Commission is to provide you with valuable information and assistance. The information they provide is intended to help you avoid unnecessary problems, expenses and delays. The Planning Commission meets on the third Monday of each month, as necessary, at the John Bird Accounting Building located at 1116 Mills Street in the Village of Black Earth.

Things to Consider

Common questions to ask when purchasing land or considering land development within the Town include:

- a. *Are the soils suitable for a septic system?*

Most soils in the Town pose severe limitation for septic system installations. Limiting factors include soil permeability, depth of bedrock or water table and susceptibility to flooding in some cases. In addition, slope of the land affects the layout and construction difficulties as well as risk of erosion and water runoff. It is best to obtain several soil samples to understand the suitability of your land.

b. *Is the site susceptible to erosion?*

Scenic hillside sites are often susceptible to erosion. Following basic erosion control measures such as minimizing earth movement, following natural contours and maintaining vegetative cover will reduce the risk of erosion and make future maintenance easier and less expensive.

c. *What services does the Town provide?*

The Town of Black Earth provides basic services to residences. These services include snow removal from Town road and emergency services. Sanitary-recycling facilities are available for a fee.

d. *What kind of zoning is required?*

Nearly all the undeveloped land in the Town is zoned A-1EX (Exclusive Agriculture) under Dane County zoning regulations. Thus rezoning is required for home construction. Generally, new homes are zoned RH-1 (Rural Homes, One-Family), although there are a number of different residential zoning districts depending on the scenario. The Town of Black Earth requires a minimum of one (1) acre of land area to create a residential lot. Each rezoning request is considered and decided upon individually.

Be Aware of Town Development Policies

The Town has adopted a number of policies to ensure land development patterns occur in a manner that protects landowners, promotes public health and safety as well as protects the natural environment. The Town and Dane County review all applications for land use or land divisions based on these adopted policies. For a full list, please refer to the Town's adopted Comprehensive Plan and Code of Ordinances. Some of these policies include the following:

- a. Residential lots to be served by a private sewage system must meet the rules of the Wisconsin Department of Industry, Labor and Human Relations. The Town of Black Earth prohibits the use of holding tanks.
- b. Residential parcel size must be a minimum of one (1) acre.
- c. The Town of Black Earth prohibits mobile homes.
- d. Multi-unit residential development is prohibited.
- e. The Town follows the policies contained in Chapter 4 of the Code of Ordinances when approving driveway permits.

Rezoning Approval Process

All rezoning within the Town is governed by the Dane County Zoning Ordinance and the Town of Black Earth Comprehensive Plan and administered by the Dane County Zoning Department. All applications need to be consistent with these Ordinances and Plans in order to be approved at the local and County levels. Town approval is the basis for County action. Rezoning is a lengthy process, usually taking several months. Public hearings are held at the Town level as well as at the County level. While this outline intends to identify the standard procedures for rezoning a parcel in the Town of Black Earth, additional steps or information may be required by the Town Board or Dane County. Please refer to the Town and County Ordinances for more detailed outlines of the materials and process required for approval of rezoning, conditional use permits, and land divisions.

1. Contact the Town Clerk to have your petition placed on the agenda for the Planning Commission to consider. As stated above, the Planning Commission can help with some of your questions and concerns. It is recommended that a property owner or developer have an informational meeting with the Planning Commission prior to filing a formal application. At this meeting, please be prepared to present a conceptual plan of your proposal. This conceptual plan must identify a preliminary site plan with information about how it meets the Town's adopted policies. The more detailed information that is presented, the better feedback the Town will be able to provide.
2. After the initial meeting with the Planning Commission, the applicant shall submit a petition to rezone property to the Dane County Zoning Department. Depending on when you go to the County with your petition,

it may be several months before being placed on an agenda at Dane County.

3. Dane County will then send notification to the Town Clerk of the petition filed by the applicant. It is recommended that the applicant provide a copy of the County materials to the Town Clerk in order to expedite the process at the local level. The Planning Commission will meet again on the petition and make their recommendation to the Town Board. The Town requires three (3) full weeks before the material is put on the agenda for the Planning Commission or the Town Board. This time is necessary to accommodate required public notification for all public hearings. The Planning Commission meets on the third Monday of the month. The Town Board meets on the third Monday of each month as needed.
4. After the Planning Commission has held a public hearing and has all necessary information, they will take action and make a recommendation to the Town Board. Each project is evaluated individually and recommendations include approval, approval with conditions, or denial. The Town Clerk will forward the action to the Town board at their next regularly scheduled meeting.
5. The Town Board will take action on the petition at its monthly meeting upon receiving a recommendation from the Planning Commission. At this time the Town Clerk will also notify the County of approval, approval with conditions, or denial of the application. Any restrictions must be satisfied and agreed upon prior to full approval being granted by the Town Board.
6. Upon receiving the Town's recommendation, Dane County will hold a public hearing. The Town's recommendation is taken into consideration at this time. The County Board will then act upon the petition at their next meeting. Upon approval by the County Board, the Zoning Department will recognize a zoning change for the property.

Land Divisions

Consistent with the rezone and conditional use process, all land divisions are regulated and approved by Dane County. Certified Survey Maps (CSMs) are

necessary when creating fewer than five (5) lots and can be approved by a Dane County Land Division Review Officer. Preliminary and final plats are required when creating more than five (5) lots and require review and recommendation by the Dane County Zoning and Land Regulation Committee to the County Board. A lot is not legally created until the approved CSM or final plat is signed by all approving authorities and recorded at the Register of Deeds Office. The process for dividing land within the Town of Black Earth is outlined in Chapter 6 of the Town's Code of Ordinances. If you are interested in dividing land in the Town, please contact the Clerk for the appropriate applications and to schedule and to be included on the next Planning Commission agenda for an informational presentation.

Fees

The fees for zoning and land division applications are as follows:

Rezoning.....	\$500
Conditional Use Permit.....	\$500
Land Divisions.....	\$250 + \$10/lot

Any application submitted for a zoning permit and land division simultaneously will be required to pay both fees.
